Comments:

The wellhead injection pressures for Yaggy #1 and Yaggy #2 could not be physically read, daily, from the electronic continuous recorder for the period February 14th to about March 17th. Equipment communication failure had occurred, and this was fixed on March 17th. The equipment that failed is brand new. As of early 2023, ONEOK had upgraded electronic instrumentation on both Yaggy disposal wells. Please note: the Yaggy disposal wells have not been used for injection thus far during 2023 and the daily min and max pressures for the wellhead injection were not affected; this data continues to be retrieved from instrumentation and appropriate data is reported in the monthly reports. Roger Nikolai Kotschegarow, ONEOK Hydrocarbon, made telephone contact with Ken Brooks, KDHE, at 11:09 AM on 22Mar2023 and advised him of the issue and that a note will be submitted in the Yaggy monthly disposal well reports.
