The 2008 Water Level data were published on the Web and not in paper form. You can search for specific wells on the Kansas Geological Survey website at [www.kgs.ku.edu/Magellan/WaterLevels/index.html](http://www.kgs.ku.edu/Magellan/WaterLevels/index.html) or find the data in tabular format at [www.kgs.ku.edu/Hydro/Levels/index.html](http://www.kgs.ku.edu/Hydro/Levels/index.html)

## 2008 Water Level Data Acquisition Statistics

### Summary

The field-measurement phase of the 2008 annual cooperative water-level measurement program was successfully completed by both the Kansas Geological Survey (KGS) and the Division of Water Resources (DWR), Kansas Department of Agriculture, prior to March 1, 2008. The annual program is designed to regionally sample the High Plains aquifer in Kansas so trends can be established and evaluated for effective incorporation into water-resource management strategies. Water levels were recorded in 93.3% of the 1,432 network wells in 2008. The KGS measured 508 wells and the three DWR offices (Garden City, Stafford, and Stockton) measured 924 wells. Two trips made by KGS staff to acquire data were completed in January.

Based on spatial analysis of the 2007 annual network-well distribution, 17 locations were identified that required additional water-level data to permit continuous and uniform sampling of the High Plains aquifer. Wells were identified in these locations with sufficient construction and historical information and landowner cooperation to attempt a water-level measurement. Of the 17 wells, 12 were actually measured. These 17 provisional wells were incorporated into the network for 2009 and will be measured in all future measurement campaigns unless the wells become unreliable or are plugged. Yearly geostatistical studies will define undersampled areas and will be used to select optimum locations for replacement wells to eliminate extraneous holes in the hexagonal network.

## Appendices

The two appendices to this report are summary tables.

Appendix A Contains a summary of information for all wells measured by KGS. This appendix includes only county, well legal description (ID), and 2008 depth of water below ground surface (BGS). Quality Assurance measurements (QA) and Provisional wells (PROV) are also identified.

Appendix B Contains a summary of information for all wells measured by DWR. This appendix includes only county, well legal description (ID), and 2008 depth of water below ground surface (BGS). Provisional wells (PROV) are also identified.

Both the current year's measurements and historical water-level data are archived and maintained at the KGS in a centralized database (WIZARD) that can be accessed at the KGS website at [www.kgs.ku.edu/Magellan/WaterLevels/index.html](http://www.kgs.ku.edu/Magellan/WaterLevels/index.html). Just the Township-Range-Section identifier and the water level for each well measured are also provided in tabular form at [www.kgs.ku.edu/Hydro/Levels/index.html](http://www.kgs.ku.edu/Hydro/Levels/index.html).
