

Kansas Geological Survey – Wichita Sample Preservation Activities - 2022

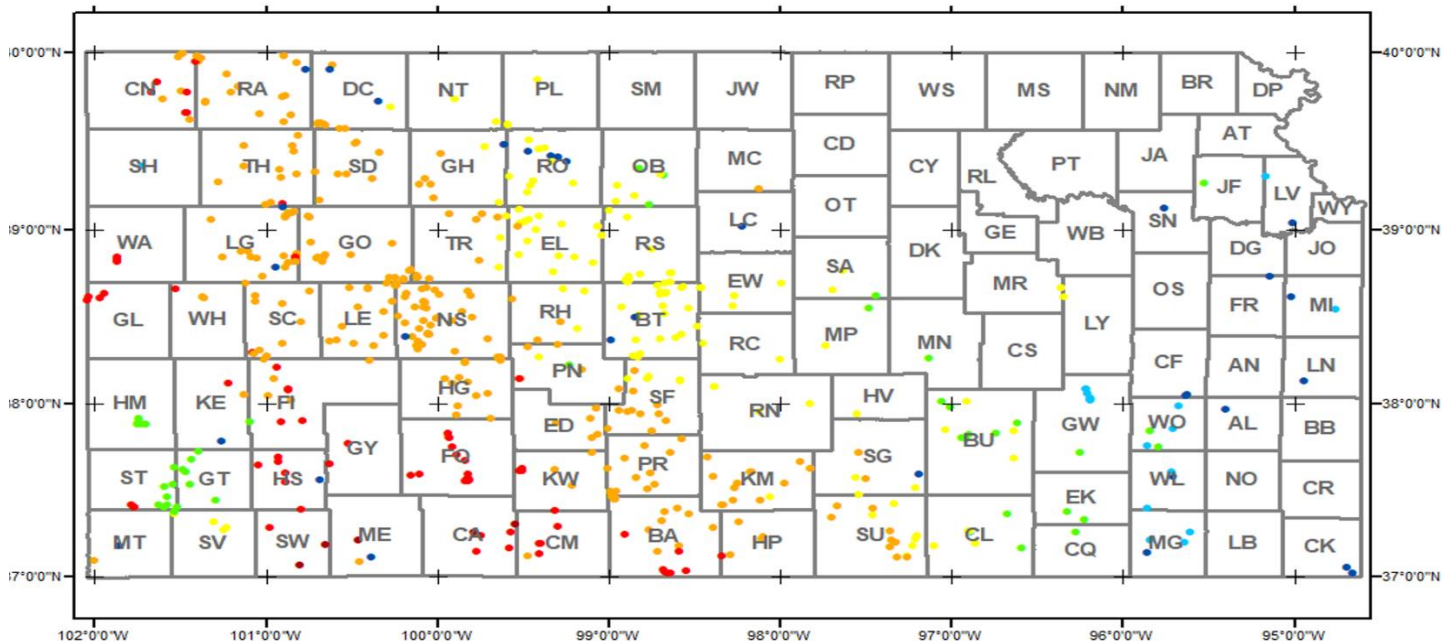

Oil and gas companies provided the Survey with geologic samples from 584 oil and gas wells.

- ❖ Samples from 450 wells were preserved at an average rate of nearly 876 sample feet per hour for a total of 537 processing hours.
- ❖ 66,250 sample envelopes and 1,627 sample boxes were used to preserve and restore well samples.
- ❖ Samples from sixty nine wells were not geologically significant to the oil or gas operator or the sample collection, so they were discarded.
- ❖ Staff preserved 445,401 sample feet, roughly 84 miles.
- ❖ Funded 1,256 hours to restore samples for wells and resolved 12,643 sample preservation issues, including the recovery of missing samples for 178 wells.

Feet and Number of Wells
