

This map was prepared by the staff of the Kansas Geological Survey and is based on Oil and Gas Fields in Kansas (1967) and subsequent revisions with the same name (1975, 1989, 1990, 1993, and 2009). Fields are represented according to their status as of February 1, 2019. Listings of fields by location, name, and cumulative production are found in the Survey's interactive oil and gas map viewer located at <http://maps.ags.ku.edu/oilgas/index.cfm>. For viewer instructions, click on the "Help" tab at the top of the page. Due to frequent data updates, field and production area boundaries may differ slightly from those shown on this map. All fields are shown without differentiation between active and inactive.

As set forth in Kansas Administrative Rule 82-3-102, field boundaries are determined by the Kansas Corporation Commission after considering the recommendations of the Conservation Division, Kansas Corporation Commission, and the Nomenclature Committee, Kansas Geological Survey. Data from the Independent Oil and Gas Service, Inc. (IOGAS) were used to correct or verify some field and area boundaries.

Roads and highways are shown on the map as represented by data from the Kansas Department of Transportation (KDOT) and other sources.

This map was produced using the ArcGIS system developed by Environmental Systems Research Institute, Inc. (Esri).

Computer compilation and cartography by Richard B. Jarvis, Emily C. Hadley, and John W. Dunham. Digital data compilation by Michael J. Killam. 2019 revision by John W. Dunham and Arefeh Hosseini.
